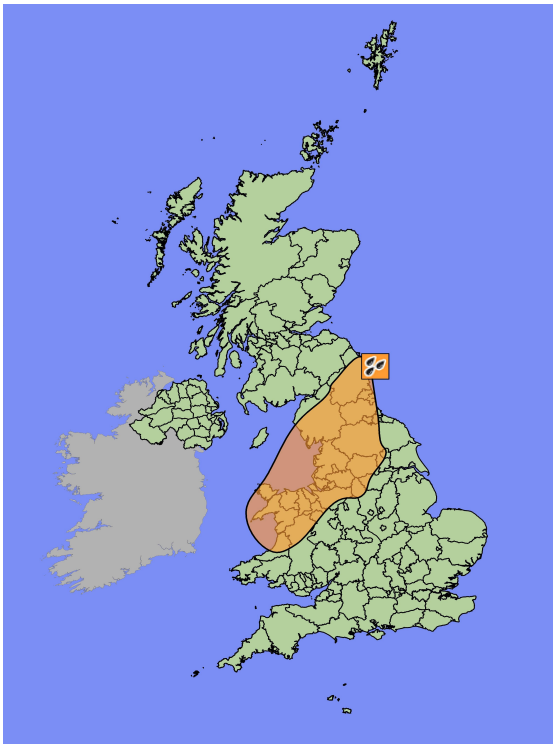
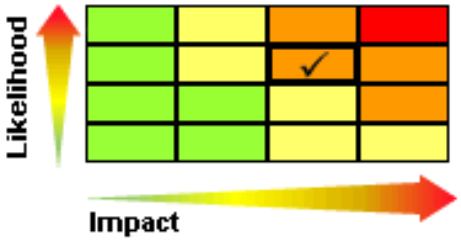
National Severe Weather Warning Service





Chief Forecasters Assessment
The area of low pressure centred over northeast England will move southwest during today, to be close to Anglesey by evening. Further spells of heavy rain are expected, particularly over high ground, leading to a further 25-50 mm of rain over parts of northern England and northwest Wales in particular. Following the heavy rain during Monday, this will cause further flooding.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **09:30 on Tue, 25th Sep 2012** until **23:59 on Tue, 25th Sep 2012**

Further periods of heavy rain are likely to occur across parts of northern England and north and west Wales during much of Tuesday.

The public should be prepared for a continued risk of both surface water and river flooding during this period. Flooding issues may be exacerbated in places by drainage impeded by debris, for example leaves and small branches blown from trees.
